## Health Education Policy

Governance Policy	√	Date Approved	March 2022
Management Policy		Date Next Review	March 2026

### Rationale

Health education is a required component of the Alberta Education curriculum. It is taught in Grades 4-9 and as part of Career and Life Management in Grades 10-12.

### Guidelines

The following guidelines inform the approach to Curriculum Design and delivery:

1. As with all curriculum at CAIS, the approach will be informed and shaped by God's Word. The school works with parents to provide an age appropriate approach to this topic.
2. The school recognises that students are made in the image of God and have their identity and value by virtue of this fact.
3. Learning will take place in an environment that respects and honours student dignity.
